Profile

Innovative and detail-oriented Web Developer with over three years of experience, specializing in creating intuitive and visually appealing web interfaces. Proficient in **HTML, CSS, JavaScript,** and modern frameworks like **React** and **Sass**, with a strong focus on user-centric design and seamless user experiences. Experienced in utilizing advanced design tools and methodologies to craft responsive, accessible, and aesthetically pleasing applications. Passionate about leveraging **UI/UX** principles to drive results and deliver impactful solutions.

Employment History

Web developer, Network London Agency, London

MAY 2022 — NOVEMBER 2024

- **JavaScript Integration:** Implemented complex JavaScript logic into landing pages to enhance functionality and user experience.
- **API Data Management**: Integrated data from API servers to ensure dynamic content is displayed accurately on websites.
- **Data Feeds:** Worked with various data feeds, including pulling and integrating data from Google Sheets to keep website content up-to-date.
- **Component Development:** Built and integrated new components into websites, enhancing their functionality and interactivity.
- **Responsive Design:** Ensured all websites are fully responsive, providing an optimal viewing experience across different devices and screen sizes.
- **Advanced Animations:** I created and designed high-level animated banners that captivated users and effectively conveyed messages..
- **Team Collaboration:** I engaged in close collaboration with cross-functional teams to meet client requirements and deliver high-quality results.
- **Code Maintenance:** Identified and resolved code issues promptly to ensure smooth and uninterrupted website performance.
- **Tools Utilization:** Proficient in using a range of tools including Adobe Photoshop, Figma, Adobe Illustrator, Adobe XD, and Visual Studio Code to efficiently complete tasks and deliver high-quality results.

Junior front-end developer, UGS Ultra Group Company

JULY 2021 — JANUARY 2022

- As a Junior Front-End Developer, I have been responsible for:
- **Design Translation**: Converted .psd and .xd files into fully functional and responsive landing pages.
- **Prototyping:** Developed advanced prototypes in collaboration with senior developers to visualize complex functionalities.
- **API Integration:**Integrated data from APIs to ensure dynamic content rendering across websites
- A**nimations:** Created interactive and animated banners using Google Web Designer, optimizing for platforms like Google Ads.
- **Reusable and Modular Components:** using **Vanilla JavaScript**, ensuring scalability and maintainability across projects.

- **Testing and Debugging:** Conducted extensive testing to identify and resolve technical issues, ensuring smooth user experiences**.**
- **Responsive Design:** Ensured optimal user experiences across devices by applying media queries and advanced CSS techniques.
- **Design Tools Utilization:**Leveraged tools like Adobe XD, Photoshop, and Illustrator to create assets and refine designs

Education

Computing Science, Coventry University , London

MARCH 2019 — FEBRUARY 2021

Along the university studies the following fields were practiced in virtual machines:

- Cyber Security - Ethical hacking and penetration tests, hackthebox lab has been used to practice penetration tests to the servers.
- Networking - cisco packet tracer to build networks and creating subnet masks.
- Programming - Python, Object oriented programming.
- Operating Systems - Debian and windows server 2012.

Courses

Javascript, Udemy

JUNE 2020 — SEPTEMBER 2020

React, Udemy

FEBRUARY 2022 — JULY 2024
